POST请求接口

POST http://192.168.1.114.10:8080/api/servo/move_to_backward_end1

执行刷子清洁

POST http://192.168.1.114.10:8080/api/servo/move_to_backward_end1
请求体：无 Response: 200 OK cleaning

POST http://192.168.1.114.10:8080/api/scan_mode

执行雷达扫描

POST http://192.168.1.114.10:8080/api/scan_mode
请求体： 无 Respons e:200 OK scanning

POST http://192.168.1.114.10:8000/api/servo/move_to_ backward_end

执行雷达复位

POST http://192.168.1.114.10:8000/api/servo/move_to_ backward_end
请求体：无 Response: 200 OK

POST http://192.168.1.114.10:8000/api/delete_all_pcd

删除PCD文件

POST http://192.168.1.114.10:8000/api/delete_all_pcd
请求体：无 Response: 200 OK All PCD files deleted successfully.

GET请求接口

GET http://192.168.1.114.10:8000/api/pcd_files

获取PCD文件

GET http://192.168.1.114.10:8000/api/pcd_files

请求体：无
 	
Response:
200 OK
 	
{
"files": [
"output_pointcloud_0.pcd",
"output_pointcloud_1.pcd",
"output_pointcloud_2.pcd"
]
}

POST http://192.168.1.114.10:8080/api/progress

获取扫描进度

POST http://192.168.1.114.10:8000/api/progress

请求体：无
 	
Response:
200 OK
 	
{
"progress": 0.0
}

WS接口

ws http://192.168.1.114.10:8001

实时状态接口

ws http://192.168.1.114.10:8001
scan_status: ready, reset_status: reset_completed, gimbal_status: 0,servo _status: cleaned, progress: 0.000000

ws http://192.168.1.114.10:8002

获取扫描进度

ws http://192.168.1.114.10:8002
实时数据接口，在雷达扫描被触发时可以拿到雷达实时数据
